Art Unit 1713

1. Amendments presented in the response of May 20, 2003 are acknowledged and deemed to obviate the objection to the disclosure and the § 112/2d paragraph rejection as set out in the prior Office action. New claims 14-26 have been renumbered by the examiner as claims 13-25, respectively, as per 37 CFR 1.126, since claim 12 was the highest numbered claim previously presented. Accordingly, claims 13-25 are currently pending and under examination.

2. In regard to the Information Disclosure Statement filed March 25, 2002, it is noted that a copy of an examiner-initialled Form PTO-1449 was attached to the previous Office action; however, the original cannot be located in the application file. In order to complete the record herein, applicants are requested to furnish a copy of the initialled Form PTO-1449 in responding to this Office action.

3. Claims 13-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. More specifically, the following grounds for indefiniteness apply to the indicated claims.

Art Unit 1713

(A) Claim 13 is ambiguous in the recitation of a "joint" flash point and a "joint" boiling point following the expression "one or more phlegmatisers". As the term "joint" means several, it is unclear if and how the limitations as to flash point and boiling point apply where a single phlegmatiser is used in the claimed method. If the stated flash point and boiling point are intended to apply to a single phlegmatiser, amending claim 13 as per the specification at page 5, lines 11-14 would serve to eliminate any ambiguity.

(B) Claim 16 is indefinite due to dependency on a cancelled claim, i.e., claim 1. (See claim 16, line 6.)

(C) Claim 19 is indefinite due to omission of the number of the claim from which dependency is intended (see line 1).

(D) Claims 24 and 25 are confusing and misdescriptive in referring to "a peroxide formulation, as claimed in any of Claims 14-22, [sic, 13-21]," since each of the referenced claims is drawn to a method, not a formulation or composition. In addition, insofar as the reference to "a peroxide formulation" is intended to claim use of the peroxide formulation defined in the referenced claims as such, claims 24 and 25 are improper dependent claims for failing to include all the limitations of an earlier claim,

Art Unit 1713

including the peroxide-containing container as defined in claim 13. Clarification and appropriate correction are required.

4. Applicants' arguments filed May 20, 2003 have been fully considered but they are deemed moot in view of the new ground of rejection.

5. Claims 13-25 are allowable in substance over the prior art record.

6. In view of the new grounds of rejection, this action is made non-final.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner F. M. Teskin whose telephone number is (703) 308-2456.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu, can be reached on (703) 308-2450. The appropriate fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 (non-after finals) and (703) 872-9311 (after-finals).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661.
